

ADHD for the Pediatric Provider

Wednesday, October 31, 2018 (12 - 1 p.m.)

Target Audience

Physicians, advanced practice professionals, mental health providers, therapists, clinicians, and other interested health care professionals.

Description

Providers from the North Carolina Pediatric Access Line (NC-PAL) will offer guidance in the screening, assessment, diagnosis, and treatment of ADHD in children and adolescents. This presentation will be targeted towards pediatric providers in primary care and is strategically timed for the start of the academic school year.

NC-PAL is a telephone consultation program designed to help pediatric health care providers address the mental health needs of children and adolescents in the counties of Vance, Granville, Franklin, Warren, Halifax, and Person. It is a collaboration between Cardinal Innovations Healthcare and Duke Psychiatry and is a component of Duke Integrated Pediatric Mental Health.

Objectives

- Discuss ADHD epidemiology.
- Be able to assess for and diagnose ADHD in children and adolescents.
- Describe other mental illnesses that could present as ADHD symptoms.
- Review reasons for treating ADHD.
- Discuss increased safety, comfort, and prescribing options in ADHD psychopharmacology.
- Describe and review other behavioral treatment options for ADHD.

Fee

There is no fee for this web conference.

Speaker

J. Nathan Copeland, MD, MPH, is a Medical Instructor in the Duke Division of Child and Family Mental Health and Developmental Neuroscience, an attending physician in the Duke Center for Autism and Brain Development, and NC-PAL Child Psychiatrist. His clinical interests include the impacts of autism and mental health on children and their families, psychopharmacologic management of mental illness, community resources and therapy options, mental health systems and policy, and residency education.
